50 Policy BD3 (Basement Development):

Agreement matrix BD3 - How strongly do you agree/disagree with this policy?:

Strongly disagree

Is not Positively prepared, Is not Justified, Is not Effective, Is not Consistent with national/regional policy

For those which have been checked, please state your reasons:

The current and proposed plans for basement developments are seriously inadequate as there is no requirement for assessment of the impact of the development on local conditions, eg groundwater, the risk of flooding, the risk of subsidence in neighbouring properties etc, at the application phase, in line with other London Boroughs.

I believe this policy fails all four tests and does not address the real concerns of residents about the possible effects of basement developments on neighbouring properties. Surely these should be considered as part of the initial planning process.
